

What is claimed is:

1. An information providing apparatus that provides
information to a terminal of a user through a network,
5 comprising:

a storage unit for storing environmental conditions
that are predetermined conditions for an event relating
to information provided by a predetermined information
provider;

10 a control unit for acquiring user conditions that are
inputted by the user and that are the conditions relating
to and specific to the user, from the terminal of the user
through the network; and

a structuring unit for structuring, in conformity with
15 the environmental conditions, detailed information that
is the information corresponding to the user conditions
relating for the event, wherein

the control unit distributes the detailed information
to the terminal.

20

2. The information providing apparatus according to
claim 1, wherein

the storing unit stores the user conditions, wherein
after the user conditions are stored in the storing
25 unit, the control unit extracts, in conformity with another
request for the detailed information from the user, part
corresponding to the user conditions stored in the storage

unit, of other user conditions corresponding to the another request for the detailed information, and acquires part not corresponding thereto through an input by the user, and wherein

5 the extracted part can be changed by the user.

3. The information providing apparatus according to claim 1, wherein the structuring unit executes at least one program for creating the detailed information.

10

4. The information providing apparatus according to claim 1, wherein the structuring unit has a plurality of programs for creating the detailed information, selects one program in response to at least one of the nature of
15 the event, the environmental conditions and the user conditions and executes the selected program.

5. The information providing apparatus according to claim 1, wherein, when a predetermined condition among the
20 user conditions is not yet set, the structuring unit temporarily sets at least one set value that the predetermined condition may take and creates the detailed information using the set value.

25 6. The information providing apparatus according to claim 1, wherein, with the change of the environmental conditions, the structuring unit re-creates the detailed

information about the event based on the changed
environmental conditions at a timing designated by the user,
and wherein

the communication unit distributes the re-created
5 detailed information to the user.

7. The information providing apparatus according to
claim 1, wherein information provided by the information
provider is a news article or a publicity provided over
10 a network.

8. The information providing apparatus according to
claim 7, wherein the information providing apparatus is
linked via a network with a site on the network for providing
15 the news article or the publicity.
